Safety Data Sheet

Section 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier
Trade name: Wet Wipe Ethanol Disinfection
Item no.: 25067, 25069.
PRn. no.: 2335489.

1.2. Relevant identified uses of the substance or mixture and uses advised against
Disinfection of surfaces.

Relevant identified uses of the mixture:
SU20 Health services.

Product types: PT2 Disinfectants and algaeicides not intended for direct application to humans or animals.
Chemical Product Category:
PC8 Biocidal Products (e.g. Disinfectants, pest control).

Users advised against:
Avoid application on skin. Other uses than those identified on the product label are not recommended. For professional users, only.

1.3. Details of the supplier of the safety data sheet
Company name and address:
Wet Wipe
Vallensbaekvej 65
DK-2625 Vallensbaek
Denmark
Phone.: +45 70 266 244
www.wetwipe.eu
info@wetwipe.eu

Compilation date: 16.05.2017

1.4. Emergency telephone number
Use your national or local emergency number.
(DK) +45 82 12 12 12

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture
Classification according to CLP, Regulation (EC) 1272/2008.
Flam. Liq. 2; H225
Eye Irrit. 2; H319

2.2. Label elements:
Hazard pictograms (GHS):
Signal word: Danger

Hazard statement(s):
H225 - Highly flammable liquid and vapour.
H319 - Causes serious eye irritation.

Supplemental hazard statement(s):
EUH066 - Repeated exposure may cause skin dryness or cracking.

Precautionary statements:
Prevention: Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking (P210).
Wash exposed areas thoroughly after handling (P264).
Wear protective gloves (P280).

Response: IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do – continue rinsing (P305+P351+P338).
If eye irritation persists, get medical attention (P337+P313).
In case of fire: Use water spray or fog, alcohol-resistant foam, carbon dioxide or dry chemical to extinguish (P370+P378).

Storage: Store in a well-ventilated place. Keep cool (P403+P235).
Store in a closed container (P404).

Disposal: Dispose of according to National/local waste disposal regulations (P501).
Additional information:
Used professionally in the food and health sector. Biocide products should be used with caution. Read the label and instructions, before the product is put into service.
Data in this safety data sheet refers to the liquid in the wipes.

2.3. **Other hazards**
The product contains organic solvents.
The ingredients are not considered PBT/vPvB according to criteria in Annex XIII.

**SECTION 3: Composition/Information on ingredients**

### 3.1. Substance

**Mixture.**

### 3.2. Mixture

*See full text of H-phrases in Section 16. Contains substances with national limit values.*

**SECTION 4: First aid measures**

### 4.1. Description of first aid measures

**Eye contact:** Rinse thoroughly with plenty of water, minimum 15 minutes. Remove contact lenses, if present and easy to do.

**Inhalation:** Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if symptoms persist or any signs of respiratory distress occurs.

**Ingestion:** Rinse mouth. Do not induce vomiting. Seek medical help if discomfort or irritation occurs.

**Skin contact:** Rinse with water. Remove contaminated clothes.

### 4.2. Most important symptoms and effects, both acute and delayed

Repeated exposure to solvents may result in breakdown of the skin's natural fat layer. The skin will then be more exposed to absorption of harmful substances such as allergens. Vapor in high concentrations may cause headaches, tiredness, dizziness and nausea.

### 4.3. Indication of any immediate medical attention and special treatment needed

No special, immediate treatment is necessary. If any discomfort arises, treat symptoms and bring safety data sheet when you contact a physician.

**SECTION 5: Fire-fighting measures**

### 5.1. Extinguishing media

**Suitable:** Alcohol-resistant foam, carbonic acid (CO2), powder, water mist.

**Unsuitable:** Full water jet can spread the fire.

### 5.2. Special hazards arising from the substance or mixture

Flammable liquid and vapor.
Hazardous combustion products: Carbon oxides (COx).

### 5.3. Advice for fire-fighters

If it can be done without danger, remove containers from the fire threatened area. Avoid inhalation of vapours and fumes. Use self-contained breathing apparatus and chemical protection suit, if personal (close) contact is likely.

**SECTION 6: Accidental release measures**

### 6.1. Personal precautions, protective equipment and emergency procedures

Use gloves during prolonged or repeated contact.

### 6.2. Environmental precautions

No special environmental precautions required.

### 6.3. Methods and material for containment and cleaning up

Gather and place in suitable container. Dispose of according to local regulations.

### 6.4. Reference to other sections

See section 8 for protective equipment and section 13 for waste disposal.

**SECTION 7: Handling and storage**

### 7.1. Precautions for safe handling

Biocidal products should be handled with caution. Follow direction in section 8 for appropriate handling. Avoid contact with skin and eyes.
7.2. Conditions for safe storage, including any incompatibilities

Storage:

Store in closed containers, in a ventilated room, protected from direct sunlight. Recommended storage temperature 5 to 25 °C. Keep out of reach for children.

Impregnated wipes are not subject to technical regulations for flammable liquids.

7.3. Specific end use(s)

See section 1.2.

SECTION 8: Exposure controls/personal protection

8.2. Exposure controls

**Occupational exposure controls:**

Use common occupational hygiene. Ensure good ventilation. Personal protective equipment must be CE approved. Recommended protective equipment and specified standards are indicative. A

**Respiratory protection:**

Normally not required. When working in small non-ventilated spaces, use suitable breathing apparatus. Filter type (A)
Hand protection: 
In case of repeated or prolonged contact wear protective gloves of resilient material, e.g. Butyl rubber. Nitrile

Skin Protection: 
Normal work clothes. Wash / flush the exposed areas.

Eye / Face protection: 
Avoid contact with eye and eye surroundings during use of wipe.

Environmental exposure controls: 
Avoid discharge into sewers and wastewater treatment plants. Disposal of waste should be in accordance with the requirements of the regional and local authorities.

SECTION 9: Physical and chemical properties

9.1. Information on basic and chemical properties

- Appearance: White, non-woven wipe material
- Odour: Alcohol
- pH: 4 to 8
- Melting point/range: < -20 °C. Applies to the liquid
- Boiling point: 78 °C for the liquid in the cloths.
- Flash point: ~ 22 °C.
- Auto-flammability: > 425 °C.
- Evaporation rate: Not available
- Vapour pressure: Not available
- Oxidising properties: Not oxidising.
- Explosive properties: Not classified as an explosive.
- Solubility in water: the liquid can be diluted in the napkins.

9.2. Other information

- 10.1. Reactivity
None known.

- 10.2. Chemical stability
Stable at recommended storage temperatures.

- 10.3. Possibility of hazardous reactions
Hazardous reactions will not occur under normal transport or storage conditions.

- 10.4. Conditions to avoid
Avoid sunlight and high temperatures.

- 10.5. Incompatible materials
Avoid oxidizing agents, alkaline oxides, non-metallic anhydrides / acids, hydrides, mercury compounds, silver compounds. Not compatible with Polyurethane (PUR / U). Repeated contact with materials such as polyacrylates, nitrile and PVC may cause softening, loss of strength, swelling and/or scalding. Possibility of reaction with other substances can not be excluded.

- 10.6. Hazardous decomposition products
No known hazardous decomposition products.

SECTION 10: Stability and reactivity

10.1. Reactivity
None known.

10.2. Chemical stability
Stable at recommended storage temperatures.

10.3. Possibility of hazardous reactions
Hazardous reactions will not occur under normal transport or storage conditions.

10.4. Conditions to avoid
Avoid sunlight and high temperatures.

10.5. Incompatible materials
Avoid oxidizing agents, alkaline oxides, non-metallic anhydrides / acids, hydrides, mercury compounds, silver compounds. Not compatible with Polyurethane (PUR / U). Repeated contact with materials such as polyacrylates, nitrile and PVC may cause softening, loss of strength, swelling and/or scalding. Possibility of reaction with other substances can not be excluded.

10.6. Hazardous decomposition products
No known hazardous decomposition products.

Eco-toxicological data for the mixture are not available.

12.2. Persistence and degradability

Readily biodegradable.

12.3. Bioaccumulative potential

No bioaccumulative potential.

12.4. Mobility in soil

No data available.

12.5. Results of PBT and vPvB assessment

The product contains no identified PBT/vPvB substances.

12.6. Other adverse effects

None known

SECTION 13: Disposal considerations

13.1. Waste treatment methods

Dispose of in accordance with local and national regulation. The penetration of the product into drains, water courses or the soil should be avoided.

The hazardous waste codes are indicative. EAK code No. 15 02 02/07 07 04
