

Future Disinfection Now

wetwipe[®]

Our innovative and effective product solutions are created in close collaboration with users as well as our extensive network of leading independent specialists.

About us

Founded in 2007, Wet Wipe is a Danish family owned company that since its foundation has developed, produced and sold a portfolio of highly specialized single-use wipes. The wipes contain cleaning & disinfection solutions targeting specific sectors which have a need for surface cleaning and disinfection.

Research & Development takes place in Denmark in our dedicated team of scientists and technical experts. Manufacturing is located in Germany, in Europe's most modern factories within their field, and the products are sold worldwide, either through established subsidiaries or distributors.

Today we deliver to the healthcare, food, veterinary and dental sectors as well as the primary care and transport industries.

Jesper Heeno Andersen
R&D Manager

Wet Wipe focuses on helping you as a customer increase your output, work smarter and optimize the daily workflow.

R&D Department

Wet Wipe is regarded as being one of the first movers within high quality wipes for disinfection and cleaning in the health sector. Cooperation with microbiologists, environmentalists and doctors across Europe has helped define the precise issues to which sustainable cleaning and disinfecting solutions have been found.

Our R&D department focuses exclusively on the development of cleaning and disinfection solutions, together with application materials, creating the most efficient products for the user.

National, European and International contacts

Our products are developed through utilizing knowledge from national, European and international contacts and user driven innovation. They are tested in close collaboration with leading independent microbiological laboratories in Germany, Sweden and Denmark.

Economy

- Simplify logistics
- Increase efficiency
- Streamline workflow
- Easy implementation

Documentation

- Proven microbiological effect
- Full traceability

Quality

- Same quality - every time
- Avoid cross contamination
- Minimize the risk of user errors

Employees

- Increase safety
- Improve work environment
- User friendly
- Easier workflow

Concept

The highly specialized solutions from Wet Wipe have been developed to reduce the time you spend on cleaning and disinfecting. By introducing a single-use cleaning & disinfection concept you eliminate unnecessary washing, transport and product control, which makes the work flow easier, safer and more efficient.

The Wet Wipe cloths have been developed in cooperation with the Danish Occupational Health Services with special focus on ergonomics, user friendliness and the work environment.

The products are colour coded, thus helping the user to quickly identify the correct product. The products are designed in a way that eliminates the need for manual mixing and measuring of chemicals.

By using single-use wipes, contamination of the workstation as well as the route of infection is minimized.

Quality management

Wet Wipe is ISO 9001 and ISO 13485 certified and compliant. In this way, we strive to meet the expectations of our customers as well as managing our quality processes across all departments.

The production site for our wipes complies with cGMP and HACCP quality standards and product quality is strictly monitored by Wet Wipe's product and development team.

We comply with ISO 14971 Risk Management in all stages of the product design and manufacturing.

Environmental awareness

We have continuous focus on our customer's needs to optimize their hygiene level and fight infection – and yet, respect the environment. We strive to develop sustainable products so the user neither handles nor is exposed to dangerous chemicals.

As a result, we have developed a non-woven that removes 99.9% of bacteria, keeping the amount of chemicals to a minimum.

As contact allergy is the only allergy that can be prevented, we have products that are approved by Asthma-Allergy Denmark and assessed by toxicologists to minimize the risk for contact dermatitis.

We help companies improve their environmental footprint by minimizing their water consumption and reducing the amount of chemicals used.

CERTIFIED BY

**Asthma-Allergy
Denmark**

We have a palette of products as well as the flexibility to modify them or develop new solutions as needed. Together we come up with the best solution for you.

Sectors

Through years of experience we have gathered expertise in a variety of sectors that gives us the knowledge to help you with your challenges. We are in continuous dialog with users from every sector in order to keep up with the changing work environments and growing needs.

Curiosity is what drives us.

Healthcare

Cleaning

Product range

We know that you as a customer are constantly working in a rapidly changing environment where there are high demands for performance despite increasing complexity. A wide range of our products are developed to reduce the risk of incidents happening in everyday situations by providing the customer with ready to use products. Wet Wipe's portfolio includes products there are registered as medical devices, biocides, cosmetics, anti-allergenic and approved for the food industry.

The product range covers wipes, liquids, tablets, sprays and gels.

Due to the uniqueness of the products, Wet Wipe has several registered patents.

Levels

Within surface disinfection we have products that are designed for the different types of levels from general cleaning, routine disinfection to isolation and outbreaks.

Thanks to the uniquely perforated surface of the cloth it enables you to remove 99,9% of bacteria while wiping surfaces.

1 Cleaning
Time saving and efficient cleaning

2 Routine disinfection
Against vegetative bacteria, yeast fungus and viruses

3 Isolation and outbreak
Disinfection during isolation and outbreaks

Our promise

We help you to contribute to a healthier world today by fighting tomorrow's infectious diseases.

We acknowledge that working within the cleaning and disinfection industry is challenging and demanding therefore we strive to ensure a safe and better work environment.

We commit ourselves to minimize your environmental footprint by using the most optimal and sustainable solutions in order to pass on a healthier world for the coming generations.

"We learn, develop and improve every day. The idea of continuous improvement is one of the pillars of the Wet Wipe way of working. It's alive in all that we do."
